

PROJECTS FOR AND WITH COMPANY PARTNERS

Sustainable Resources

Utilizing new biological resources for industrial processes and innovative products through biotechnological tools, e.g. artificial meat, bio-based food and cosmetic ingredients and supplements.

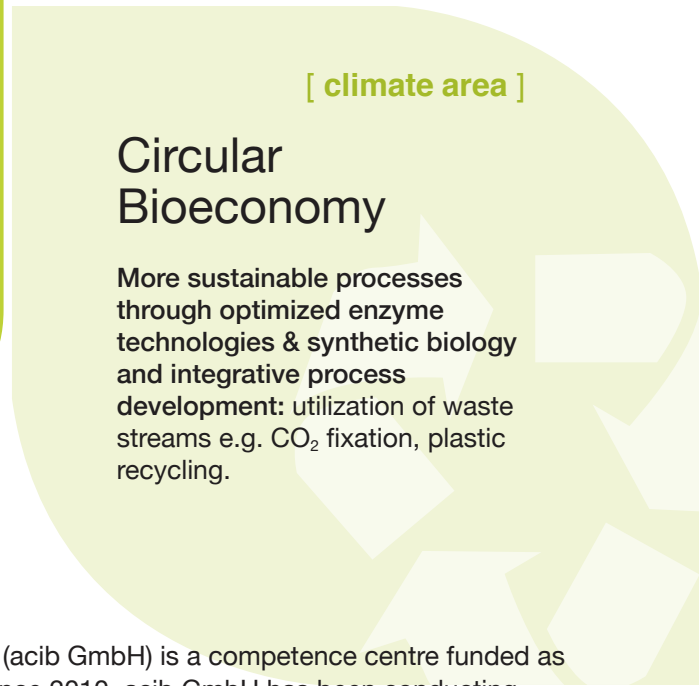

[resources area]

[health area]

Efficient Biopharma

More efficient biopharmaceutical production through innovative production technologies and process development/ optimization; novel therapies and cell line development, e.g. gene therapy, diagnostics, vaccines, therapeutics.

[climate area]

Circular Bioeconomy

More sustainable processes through optimized enzyme technologies & synthetic biology and integrative process development: utilization of waste streams e.g. CO₂ fixation, plastic recycling.

Sustainable Solutions, inspired by Nature

The Austrian Centre of Industrial Biotechnology (acib GmbH) is a competence centre funded as a K2 center within the FFG COMET program. Since 2010, acib GmbH has been conducting research in the field of industrial biotechnology with about 200 employees. It successfully combines university core competences as well as internal know-how in application-oriented research with the current needs of industry.

The development of innovative, sustainable and economical industrial processes is our most important goal. acib GmbH bundles resources and creates synergies in order to be prepared to deal with global research questions.

We are looking for suitable project partners from industry to work on these key topics.

Through the FFG COMET funding, company partners bear a total of only 50% of the project costs.

¹ National (u.a. BOKU Wien, TU Graz, KFU Graz, Universität Innsbruck, Universität Wien) sowie International (u.a. Univ. Greifswald, Stockholm Univ., Univ. Ghent, Univ. Pavia)

BRIEF INFORMATION

Project volume

EUR 100.000 – 2.500.000 (Total volume appr. EUR 40 Mio)

Funding rate for research projects

50% (Federal and state funding Lower Austria, Styria, Tyrol and Vienna, handled by FFG)

Project duration

3 – 5 years in the period from 01.01.2024 to 31.12.2028

IP models for selection

IP MODELS

License
non-exclusive, exclusive

Transfer
IP transfer/secret

Open
Negotiation at a later time

BENEFITS FOR COMPANIES

- Attractive funding rate for applied research in globally high relevant topics
- Possibility for multi-firm projects for additional cost reduction
- Cooperation with numerous universities (national & international)
- Clear IP regulations
- Many years of experience
- High potential for commercial exploitation
- Training program for junior staff
- Interdisciplinary network as one-stop-shop for efficient handling of common research questions
